Hospitality Volunteer

SUMMARY

Creative full stack developer who possesses a passion for designing fully functional, yet elegant web applications using Python, JavaScript, and C#/.NET. My background of collaborating on diverse teams in enterprise technology sales, combined with my technical development abilities, provide me with a unique skill set that I look forward to utilizing on a team of dedicated developers. As a lifelong learner and recent graduate from Coding Dojo, I am actively seeking employment opportunities where I can continue to develop my programming skills and build robust, user-friendly web applications and products.

PROJECTS

QUOTE-LIBRARY ([REPO ON GITHUB](#))

- A virtual quote library application, developed as a solo project
- Features:* Login and registration with validations, post/delete quotes to library, add/remove quotes to user's "favorite" list, view specific user's profile
- Technologies:* Python, Django, SQLite, MySQL, Bootstrap, AWS EC2

WEATHER-CENTRAL ([REPO ON GITHUB](#))

- A weather forecasting application, developed as a solo project
- Features:* (12) Component-Single Page Application (SPA) that allows users to look at the current temperature/humidity forecasts of the USA's largest cities
- Technologies:* JavaScript, TypeScript, MongoDB (Mongoose.js), Express.js, Angular, Node.js, OpenWeatherMap API, Bootstrap

LIFT ([REPO ON GITHUB](#))

- A personal fitness and wellness application, developed as a group project at Coding Dojo
- Contributions:* Implemented CSS Styling and Bootstrap, developed back-end routing for creating and editing profile/workout schedule, used fixture to populate database with workouts, created front-end validations to control application functionality
- Technologies:* Python, Django, SQLite, Bootstrap

EXPERIENCE

SALES DEVELOPMENT REPRESENTATIVE

Pure Storage | Chicago, IL | 2/2018 – 2/2019
